

**UNION TOWNSHIP BOARD OF EDUCATION
BLOOD-BORNE PATHOGEN
TRAINING QUIZ**

DIRECTIONS: Circle the correct response True/False.

1. True False HIV and HBV may be present in body fluids other than blood.
2. True False Children that appear healthy probably are not infected with HBV or HIV.
3. True False Sexual contact and sharing infected needles are the only ways HBV and HIV can be transmitted.
4. True False Blood, vomit or urine may contain blood-borne pathogens.
5. True False You should always check latex gloves for holes to ensure they will protect you from blood-borne pathogens.
6. True False Blood-borne infections can be transmitted through an open cut or through common skin conditions like dermatitis.
7. True False The HBV vaccine is safe and effective.
8. True False Every school system must create an Exposure Control Plan and make it available to all of the employees.
9. True False Some people infected with HBV show no signs or symptoms.
10. True False Contaminated surfaces can easily lead to the spread of HBV.
11. True False Universal Precautions means treating all blood and body fluids as if they are infected with a blood-borne disease.
12. True False To effectively disinfect surfaces and cleaning tools, you may use one part bleach to ten parts water.
13. True False Only teachers and housekeeping staff are at risk of encountering blood-borne pathogens at schools.
14. True False You must carefully remove latex gloves to minimize your risk of infection.

- | | | |
|----------|-------|--|
| 15. True | False | HBV is never life threatening. |
| 16. True | False | Housekeeping staff and other school employees who clean sinks should wear proper PPE, including gloves. |
| 17. True | False | If you contract HBV, you can put your family at risk of infection. |
| 18. True | False | There's no need to wash your hands after removing latex gloves. |
| 19. True | False | Your school system's Exposure Control Plan will identify those who risk coming in contact with blood-borne pathogens while on the job. |
| 20. True | False | Protecting yourself from blood-borne diseases requires knowing the facts about HBV and HIV and taking sensible precautions. |

ACKNOWLEDGEMENT OF TRAINING

I have seen and understand the training video "Blood-borne Pathogens in Schools".
 I have also completed and passed the comprehensive quiz.

I understand that the Exposure Control Plan is available in the Principal's Office and the Nurse's Office and that I can go to the Nurses with any questions.
